

HAKKIPIILKE[®]

AC10

HAKKIPIILKE®

AC10

- INCREASES CHAIN AND GUIDE BAR LIFE REMARKABLY
- IMPROVES THE CUTTING SPEED
- MAKES THE REPLACEMENT OF CHAIN FAST AND EASY
- LOWERS THE RISK OF BROKEN CHAINS
- NO MANUAL TENSIONING OF CHAIN

UPGRADE YOUR EFFICIENCY WITH AN AUTOMATIC CHAIN TENSIONER!

AC 10 automatic chain tensioner is available as an option for Hakkipilke Easy 38 firewood processor. AC 10 keeps the chain in optimal tension at all times which prevents the chain from breakage and loosening. The right chain tension increases the life of a chain and guide bar significantly and improves the cutting speed. AC 10 doesn't require any manual tensioning.

TECHNICAL SPECIFICATION

Features

- add-on for Hakkipilke Easy 38
- 16" guidebar
- 68 dl .325 chain 1,5 mm

AC 10 automatic chain tensioning reduce the chain elaps and cracks. (Chain and bar illustrations: COURTESY OF BLOUNT EUROPE SA/NV)

Wrong chain tension may cause wear down of the bar rails. AC 10 keeps the chain in optimal tension increasing the life of a chain.

Automatic chain tensioner makes replacement the chain fast and easy. Efficiency increases significantly when you can replace the chain in less than 40 seconds!

Check out the video and animation of AC 10 from our website www.maaselankone.fi to learn more!

With AC 10 replacing the chain is so easy that you tend to sharpen the chain more. Life of the bar and chain clearly grows. Before I needed 6-7 chains to make 1000 m³ and now I could make the same amount of firewood with just three chains. AC 10 keeps the chain in place much better than before therefore saving time for the main thing - making firewood.

Jarkko Ala-Heikkilä, Finland*

The tension of the chain is constant so there is no need to tighten it, ever! Replacing the chain is made easy with the use of only one tool, and when the only removable part is the chain the risk of losing small parts or components is minimal.
